2nd European ONE HEALTH Conference

21 – 22 June 2019

Venue: Spiru Haret University, Berceni Sos., no. 24, Bucharest, Romania

Under High Patronage of the Romanian Government
One Health is the collaborative effort of multiple health science and advanced technologies professions and, together with their related disciplines and institutions – working locally, nationally, and globally – to attain optimal health for people, domestic animals, wildlife, plants, and our environment.

The One Health concept implies the synergy of Human Health, Veterinary Medicine, Environmental Medicine, Food and Nutrition Medicine, Occupational Medicine, Comparative Medicine (zoonoses and Comparative Oncology), aiming to promote PRIMARY LIFE PROFILAXY as a major vector, and putting health care in the service of desideratum as healthier as possible with lower costs.

The main objectives of the “One Health” Concept implementation

● Healthy human does not get sick and enjoy a fully life
● The suffering human has to restore his potential and comfort as much as possible
● Reduce "per capita" costs for Health, in contrast to aggression increased by factors such as: climate change, population movements ...
● Increasing the performance and balance of the individual in general and in particular in the work and daily life

Directions of action

● Creating a collaborative platform for all professional sectors and actors in those activities may have an impact on health
● The education of the individual who must come to a new consciousness about his life and relationship with everything that surrounds him
● Elaboration and implementation of new National, European and Worldwide Regulations and Normative that must be effective in supporting the implementation of the Concept

Challenges

The major challenges that stand in front of the promotions and implementations of the concept are, as follows:

● The realization, in a very short time, the element neglected today in Romania and internationally, namely the general prophylaxis of diseases in humans, animals and the environment, of food and occupation security, through appropriate structures and legislation
● Developing and promoting licensing Technics and Procedures which rallies synergies of the founding Concept areas.
● Information and public education, adequate academic curriculum to the Concept and additional qualifications of medical staff
